REISSUE DECLARATION

Sir:

I, Kevin Weadock, declare that I am a citizen of the United States and a resident of 424 Court North Drive, Melville, New York 11747, and I, David J. Lentz, declare that I am a citizen of the United States and a resident of 1453 Caminito Batea, La Jolla, California 92037, and I, Richard J. Zdrahala, declare that I am a citizen of the United States and a resident of 6825 Stonewood Court, Eden Prairie, Minnesota 55345, and

that we believe that we are the original and first inventors of the subject matter claimed in U.S. Patent No. 5,665,114 (hereinafter the '114 patent), entitled "Tubular Expanded Polytetrafluoroethylene Implantable Prosthesis";

that we reviewed and understand the specification and the accompanying reissue application, including the claims;

that we believe that we are the original and first inventors of the subject matter which is claimed and for which a reissue patent is sought; an

that we acknowledge our duty to disclose to the U.S. Patent and Trademark Office all information known to us to be material to the patentability as defined in 37 C.F.R. §1.56.

We further declare that we believe the above-identified original patent to be partly inoperative or invalid by reason of our claiming less than we had a right to claim in the original patent. Specifically, we believe that the original patent is partly inoperative or invalid for including limitations in the claims which were not required by the prior art.

After reviewing the specification and the issued claims of the '114 patent and consulting with patent attorneys at the law firm of Hoffmann & Baron, LLP, who are outside patent counsel for Meadox Medicals, Inc., we came to the realization that we had inadvertently failed to claim certain aspects of our invention.

We believe that the error constituted inadvertent failure to appreciate the full scope of the claims which were available in view of the prior art, and that the error rose without any deceptive intent on our part.

Claim 13 of the reissue application corresponds generally with claim 1 of the '114 patent. Claim 13, however, differs from claim 1 in at least one respect including, for example:

The limitation "said material being insoluble at a pH of about 7.4. The pH range claimed in claim 1 is operative only for certain specific materials set forth in examples in the specification. The requirement that the material be insoluble at a specific pH of 7.4 was not required by the prior art.

This and other limitations in the claims resulted from the apparent failure of ourselves and our patent counsel to fully appreciate the limiting nature of the cited limitations, as well as a failure to fully appreciate the full scope of the invention as taught by the specification. During

prosecution of the application, we did not fully realize or appreciate the effect of these limitations on the scope of coverage provided by the claims.

We have always felt that a significant aspect of the present invention is that the prosthesis of the present invention includes fluid material in the pores defined between the nodes and fibrils of the expanded polytetrafluoroethylene substrate and that the fluid solidifies in its cross-link to form a solid precipitate of insoluble biocompatible biodegradable material with that material being insolubilized in place. We believe that the absence of the requirement that the material being insoluble at a specific pH of 7.4 enables the full scope of the invention to be appreciated.

Furthermore, we believe that all errors being corrected in the present reissue application arose without deceptive intention on our part.

We declare that all statements made herein of our own knowledge are true, and that all statements made upon information and belief are believed to be true and further, that these statements were made after being warned that willful false statements and the like are punishable by fine or imprisonment, or both, under 18 U.S.C. §1001, and that such false statements may jeopardize the validity of this application or any patent issuing thereon.
